

# TP 50 Peristaltic Automatic Glue Dispenser- Precision Manual Rotary Tubing Dispenser

TP-50 is a peristaltic pump dispenser used for fluids which cannot be dispensed using air. It is suitable for low viscosity materials ( cyanoacrylates, instant adhesive, anaerobic materials, solvent etc ) .

Using a microstep control( pulse control) it can give excellent dispensing accuracy. With a digital display for time setting and pressure control it has a simple, durable and easy to operate design. The head of the dispenser is also uniquely designed to ensure extended service life of the tube.

### Package Included:

- 1 x Dispenser
- 1 x dispensing pen
- 1 x Foot switch
- 1 x hose
- 1 x Power cord

# TP 50 Peristaltic Automatic Glue Dispenser- Precision Manual Rotary Tubing Dispenser

Selected materials

High specification good bearing

90 design independent research and development, high-quality

bearings, sufficient materials, better stability

Product Description:

Product Name: Digital Display Dispenser

Status: brand new

Color: as picture shown

Uses: Commercial

Type: glue machine

Product model: TP-50

Product power supply: AC220V 50/60Hz

Minimum spit volume: 0.0001ml

Product power: 10W

Product speed: 0~ 160RPM

Spit rotation angle: 0~999°

Back suction rotation angle: 1°~999°

Discharge viscosity: below 5000CPS

spit mode: quantitative glue out/manual control mode

Size: 190x230x80MM

Weight: 2.4KG

Enhanced (TP-50)

Foot switch

Power Cord

Dispensing pen

Glue bracket

Teflon tube
